DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 10-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 10 recites the broad recitation an internal combustion engine, and the claim also recites a motor vehicle which is the narrower statement of the range/limitation.

In claim 10, the "coupling piston" recited in line 5 is not a positively recited limitation. Yet, in line 12, there is a positive functional recitation of the "actuator driving the coupling piston." There is insufficient antecedent basis for this limitation in the claim.

Claim 10 recites "a coupling chamber at least partially delimited by the coupling chamber" in lines 8-9. The recitation merely states that the coupling chamber is at least partially delimited by itself. It is redundant and adds nothing to the clarity of the claim.

Claims 16-19 recite "a connecting path" in line 1. It appears to be a double inclusion of the "means" recited in claim 10, line 8.

Claims 27-29 recite "a connecting path" in line 1. It appears to be a double inclusion of the "means" recited in claim 10, line 8.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 10-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Igashira et al. (4,579,283).

Igashira et al. discloses an injection nozzle comprising:

a nozzle needle 4;

at least one injection orifice 90;

an actuator 2;
a coupling piston 3;
the nozzle needle 4 having a control surface 43 that at least partially
delimits a control chamber (volume between 43 and 76);
means 76 providing communication;
a coupling chamber 100;
an insert piece 72, 73;
a return spring 8;
a piston rod 32;
a sealing plate 71.

Regarding claim 11, the claim fails to specify a reference for the "side closer to the at least one injection orifice." Igashira's coupling piston 3 at least partially delimits the coupling chamber 100 on a side (the lower side of the injector) closer to the at least one injection orifice 90.
